Education

Metropolitan State University of Denver

B.S. in Computer Science, B.S. in Mathematics

Denver, CO

Expected May 2027

Code the Dream

Full Stack Development Cohort | JS, React, Node.js, REST APIs, Git/GitHub

Remote

Expected Feb. 2027

Work Experience

Founder & Technical Lead

OptimalDevs

Oct. 2025 – Present

Denver, CO · Remote

- Founded a four-person software development collective delivering AWS-hosted full-stack web applications for local small businesses through a zero-cost partnership model.
- Built and led a cross-functional team across full-stack development, cloud infrastructure, DevOps, and security, mentoring developers in modern web technologies and AWS deployment practices.
- Established a GitHub-based engineering workflow using Kanban planning, feature branches, pull requests, and CI checks to improve code quality and support production releases.

Dock Clerk Supervisor

Alan Ritchey

Feb. 2022 – June 2026

Denver, CO

- Supervised overnight USPS logistics operations, coordinating trailer flow, package scanning, shift assignments, and dispatch communication to keep mail processing on schedule.

Projects

optimaldevs.tech | *React, JavaScript, AWS, Node.js, GitHub Actions*

Agency Marketing Platform

- Built a responsive single-page application using React, JavaScript, Vite, Tailwind CSS, and React Router so small business owners could explore services and contact the team.
- Designed and deployed AWS cloud infrastructure using CloudFront, Amazon S3, Route 53, ACM, Lambda, API Gateway, SES, and GitHub Actions for secure hosting, contact form delivery, and CI/CD.

vics.codes Portfolio Blog Backend | *Go, SQLite, AWS EC2, Caddy, GitHub Actions, Linux*

- Built a production Go backend for a personal portfolio blog, serving dynamic technical posts through an HTTP server, SQLite database, and Caddy reverse proxy.
- Deployed and secured the backend on an AWS EC2 Linux server using GitHub Actions, systemd, Caddy HTTPS, firewall rules, key-only SSH, and automated security updates.

RESTful Multi-User Dungeon API | *Java, Spring Boot, PostgreSQL, Docker, Swagger, Heroku*

- Worked within a 7-member Agile team to build a distributed multi-user dungeon system, owning the Java Spring Boot player service for accounts, characters, and inventory.
- Engineered and tested RESTful APIs using PostgreSQL, Spring Data JPA, Hibernate, Swagger UI, MockMvc, JUnit, and Mockito to support stable service integration.

Technical Skills

Languages: Python, TypeScript, Java, JavaScript, C, Bash/Shell, Go, SQL

Tools & Platforms: Spring Boot, Node.js, Express.js, React, Docker, Kubernetes, AWS, Nginx, Caddy, Maven, JUnit, Git/GitHub, GitHub Actions, Heroku, Postman, Vitest

Databases: PostgreSQL, MongoDB, MySQL, SQLite

Skills: Microservices Architecture, RESTful APIs, CI/CD, Unit Testing, Linux CLI, Concurrency, OOP, Memory Management, Network Security

Certifications: CompTIA Security+, CompTIA PenTest+, AWS Certified Developer - Associate, MongoDB Associate Developer
